

Underpacking

Paper Sheets the original quality

Precise!

- Special method (Calibration) eliminates irregularities.
- All papers are absolutely uniform in hardness and thickness.
- Filled ISO standards for calibrated materials.
- Falls below the required tolerances of $\pm 0.01\text{mm/m}^2$.

Reliable!

- Through and through impregnation.
- Prevents moisture penetration.
- Prevents undesired tendency to bunching up.

Safe!

- Anti-slip coating for optimal result.
- Prevents slipping of the underpacking sheets.
- No thrust in the machine.
- No twisting in the machine.

Functional!

- Patented color scheme by the Inventor.
- 7 different thicknesses (0.10 mm - 0.5 mm) for optimal pressure.
- Color scheme prevents production faults.
- Color scheme facilitates the printing machine setting.

Faultless!

- High paper hardness through calibrated method.
- Compressive strength 60t/cm².
- Prevents thrusting.
- Prevents twisting.
- Prevents high dot gains.

Unique!

- More than 40 years' experience.
- Patented manufacturing methods.
- Original quality from the Inventor.
- Worldwide Number One.
