

PerfectClean

Combi-Wash UV 75

PerfectClean Combi-Wash UV75 is a powerful wash for conventional and all types of UV inks, to be used on rollers and blankets in Sheet-Fed application.

Application:

Combi-Wash UV75 is a low volatile wash for both manual and automatic application. When manually used, rinse with water as final action to remove all traces from the wash and speed up drying of the rollers or blanket. On automatic use, make sure that the last cycle uses water only. Because of its high flashpoint the consumption is low and the low evaporation speed protects the environment and working atmosphere for the printers. Not suitable on unbaked printing plates.

Approval:

ISEGA approved.

Procedure to Use:

For manual use the product can be used pure or mixed with water, applied on a clean cloth. Combi-Wash UV75 is completely miscible with water. When all the ink is removed use a Clean cloth with pure water only. For automatic wash equipment follow the instructions from the machine manufacturer.

Typical constants:

VOC content:	90% by 20°C
Specific gravity:	~0,90 g/ml
Flash point:	~75°C
Appearance:	Clear

Storage conditions:

Store at temperatures above 5°C and in closed packaging

Shelf life:

In unopened, original packaging, 5 years from manufacturing date

Packaging:

20ltr jerry can, 200ltr PVC Drum, 1000ltr IBC
